University of Utah
Course and Instructor Evaluation Written Comments Report
Fall 2008

College/School:	College of Science	Print Date:	08-Jan-09
Instructor:	HACON,CHRISTOPHER D;		
Subject:	Mathematics	Course #:	1260 - 001
		Enrollment:	36
Course:	AP Calculus II	Evaluations processed:	22

List two things about the course content, materials or design that were effective for your learning, or make constructive suggestions for improvement.

- The notes that the teacher handed us, and the reviews/answers to the midterms were effective. I did not like the book that we used however.
- The course needs more materials and resources other than an old textbook that is hard to understand.
- the teacher is very knowledgeable and interested in the progression of the students.
- The lessons were broken up into good sections that made sense. The assignments and tests were good and made sense.
- The content was very difficult and the class moved very fast to provide an in depth understanding of the material. the book presented many lessons differently than what the professor did making it hard to get help from the book.
- notes were difficult to understand. Tests were really hard
- The notes were difficult to understand and I actually learned the material better off of the internet after class. The examples could be explained better.
- The class had a lot of material that I didn't feel we prepared enough for. Most of the class did not do really well on quizzes and exams, so I think this states just about how well the class taught the material
- Very fascinating class! I enjoyed every minute of it!
- I feel like we learned the material, but the questions on tests and quizzes were very different than the questions in the homework so actually doing the homework wasn't very helpful.
- Covered lots of relevant examples in class of the equations and concepts in the books...very helpful. Concepts were explained thoroughly and yet simply.
- The problems that appeared on the exams were similar to those found in the homework, class lectures, and reviews.

HACON,CHRISTOPHER D: List two things about this instructor that were effective for your learning, or make constructive suggestions for improvement.

- Very effective professor.
- The professor did a very good job in presenting the material however the class moved very fast. We rarely spent more than 40 minutes on a subject before moving on. The final test was unlike anything we had seen throughout the semester.
- needs to review more.

- Needed to explain examples better and don't throw so many curveballs in on tests
- He didn't seem to comprehend when the class wasn't getting it. He moved so quickly that no one knew which questions to ask, so questions didn't get asked.
- He was always willing to further explain things in greater detail if it was ever needed.
- he wanted us to succeed. Timely quizzes so we had to learn the material.
- He was very knowledgeable on the subject matter and as such was able to effectively answer questions. Good at illustrating what was occurring in the problem.
- Professor Hacon is incredibly smart. He really knows the material but i think he needs to understand that we don't all understand it as well as he does. My biggest complaint is that he writes so much information on the board, information that I would like in my notebook. I am so busy writing down his notes that i don't have adequate time to comprehend what i am writing, let alone what Professor hacon is saying. Every time, he will ask "does anyone have questions?" immediately after he is done writing. Of course no one has questions because they are still writing and have no clue what he just said. We need time to absorb information and analyze it before we ask questions. A prepared notebook would be a great help here
- The instructor answered all the questions and made sure that he went over everything we learned thoroughly. That helped me a lot.
- Great job!
